

Landslide Do's

1. Maintain drainage (pipes, ditches, etc.)
2. Perform periodic inspections of property (before winter and during storms)
3. Check weep holes on walls.
4. Be alert during and following storms.
5. If you have an irrigation system, shut it off and check it out seasonally.
6. Keep fill and yard waste off slopes.
7. Leave stumps in the ground.
8. Call a professional, if you have questions or a problem!

Landslide Don't

1. Don't put fill on a steep slope.
2. Don't concentrate water on a slope.
3. Don't denude vegetation on slope without a re-vegetation plan.
4. Don't cut into the toe of a slope.
5. Don't remove tree stumps.
6. Don't place yard debris on steep slopes.
7. Don't install a permanent irrigation system in landslide-prone areas.
